Reference: SEAA #1128 Satisfactory Completion of Measuring Device Improvements

Dear Norm,

In May and October of 2006 you were provided a notice under the State Engineer's Agency Action: (SEAA) #1128 of improvements required at your diversion. The East Fork of the Virgin River, Water Commissioner Gerry Hoyt, conducted an inspection of your diversion and measuring system. This inspection indicated that the water measurement facilities in place at the time of the inspection were adequate for proper water regulation and distribution by the water commissioner.

The Water Commissioner will make final operational checks for reliability and functioning throughout the irrigation season. Currently access is a problem due to excessive willow and vegetation growth. It would be beneficial to have vegetation cleared from around the measuring device, the diversion and access path. Please stay in contact with the commissioner to insure that the remaining work is done to his satisfaction. In the future, the water commissioner will discuss additional improvements as needed with you directly.

We commend you and appreciate the diligence in your efforts to improve your diversion and ensure that the water commissioner has appropriate tools in place to both measure and regulate water.

Thank you for your cooperation in attending to this matter. This letter serves to officially remove this SEAA from active enforcement at the present time. If you have any questions, please contact Mike Silva, Distribution Engineer by phone at 801-538-7430 or by e-mail at [MikeSilva@Utah.Gov](mailto:MikeSilva@Utah.Gov) or Kurt Vest Regional Engineer, by phone at 435 586-4231 or by e-mail at [KurtVest@utah.gov](mailto:KurtVest@utah.gov).
